Title page ad hoc fix

 If the title of your presentation is too long and the border intersects with the text underneath, use the following

```
# Title
<br />
<br />
<!-- empty line here --->
Author's name University of XYZ ...
```

make sure to leave an empty line below the
tag

This is a footer 3 / 4

This is a header

Tinytext class

- use <!-- _class: tinytext --> to make some text tiny
- might be useful for References
