A very long title of my beamer-esque presentation

Author's name

University of XYZ

2022-26-03

(Only normal text is centered now)

A normal slide

H1 again

H2

H3

code
```

text

Title page ad hoc fix

- If the title of your presentation is too long and the border intersects with the text underneath, use the following

```
# Title
<br />
<!-- empty line here --->
Author's name University of XYZ ...
```

- make sure to leave an empty line below the `<br/>` tag

Tinytext class

- use `<!-- _class: tinytext -->` to make some text tiny
- might be useful for References
